Wednesday, 11 March 2009 20:33

The Lake Beulah Management District has collaborated with three other Lake Beulah area Associations to develop and issue a Combined Response to the Village of East Troy 2030 Comprehensive Community Plan.

The Combined Response covers those sections of the Village Plan which affect Lake Beulah, the lake watershed and surrounding areas and offers recommendations for improved future cooperation between neighboring governmental authorities and the Village in order to develop a Growth Plan that meets the needs of all residents and future generations.

The Combined Response was presented to all Village Board members in January 2009 and will be publicized in local newspapers as the Village undertakes a number of open hearings for discussion before the Revised Plan is adopted in June 2009.
