what he has learned so far about our community and needs, and field questions and comments from the audience. The more input we get from all of you, the better service we can provide.

Makerspace at the library

We are developing a new program here at the Library called the East Troy Library Makerspace. A Makerspace is basically any community-owned space in which people with common interests can come together to learn, collaborate, and create.

For our Makerspace we have gathered several tools to

help participants of all ages learn about new technologies, hone their "maker" skills (and not all "maker" skills are high-tech), and create wild and wacky new inventions/creations.

For example, we have two 3D printers, a sewing machine, a CNC mill, hand tools, conductive thread and other materials for e-textiles, littleBits, Snap Circuits, Arduino Microcontrollers, and construction paper and other basic craft supplies.

So, did we make you curious? While we do have some information about the Makerspace program on our

website at www.eastroy.lib.wi.us, I would also be happy to answer any questions you may have about the program, and let you know how you can get involved. Just ask.
